- Optimal illumination using variable LED light intensity.
- Noiseless and brilliant image transmission thanks to a CMOS-chip positioned directly in the tip.
- Close focus observation up to 2 mm supports more precise diagnosis.
- Increased contrast in red colour leads to improved detection of inflammation and accurate delineation.
- The combination of special light wavelengths results in improved and accurate contrast imaging.
- Easy to plug in with an integrated wireless power supply to provide high speed transmission of data.
- Grip is designed to have a comfortable feel to optimise performance and minimise stress.
- Provided as standard to help keep the field of observation clear.
- A wide 170° field of view is available for an easier visualisation.
- Combine equipment displaying this logo to ensure that you view HDTV images on your monitor.
